

CENTRAL HEATING AND COOLING

DUCTED HEAT PUMPS

Perfecting the air

WORLD LEADING

At Daikin, we're not just in the business of heat pumps. We're in the business of human comfort. Our passion for designing and engineering smart technologies ensures your comfort levels are maximised.

Daikin's recognised as an expert in air conditioning. As specialists, air conditioning is all we do. In fact, we're the only company in the world to make both heat pumps and refrigerants which enables us to deliver air conditioning solutions that are world leading in performance, quality and reliability.

*“Does it
do what
a Daikin
does?”*

CENTRAL HEATING FOR YOUR ENTIRE HOME

DAIKIN DUCTED AIR

A Daikin Ducted Heat Pump provides discreet air conditioned comfort throughout your entire home. It can be installed in a new home or tailored to suit an existing one, with only the wall controller and discreet grilles visible inside.

A Daikin ducted heat pump consists of an indoor and outdoor unit with flexible ducting inside the roof. The indoor unit is concealed out of sight in your ceiling, with flexible ducting distributing conditioned air through vents located throughout your home. An outdoor unit is positioned in a discreet location outside your home. Daikin also provides you various kind of zone controller to meet your needs.

FLEXIBLE ZONING OPTIONS FOR YOUR HOME

Daikin ducted air conditioning gives you the flexibility to heat or cool every room in your home. Your home can be 'zoned' to maximise energy efficiency and comfort. For example, you may want the bedrooms in zone one, the living areas in zone two and so on. The position of discharge grilles can also be tailored to suit the shape of each room, for optimum air circulation.

COMFORT ALL YEAR ROUND

1. INDOOR UNIT

Concealed in the ceiling, the indoor unit continually draws in return air over its heat exchanger and blows cooled or heated air back into your home.

2. OUTDOOR UNIT

Featuring inverter technology, the outdoor unit takes the hot or cold air from the indoor unit and expels it outside.

3. ZONE CONTROLLER

Up to 8 zones can be managed from the Zone Controller. Zones can be turned On or Off and with our AirHub Linear Zone Controller, zone temperature can be adjusted $\pm 2^{\circ}\text{C}$ of the set point.

DAIKIN DUCTED AIR CONDITIONING AT A GLANCE

Return air grille with filter to remove household dust

Indoor unit concealed in the ceiling or under the floor

Small diameter, concealed refrigerant pipes

Outdoor unit

Ducting distributes conditioned air throughout your home

Up to eight zones can be managed from a single controller

DAIKIN TECHNOLOGY

INDOOR UNIT

1

INDOOR HEAT EXCHANGER

Our new indoor heat exchangers have been designed to deliver maximum capacity output in a compact casing size. Through the use of cutting edge technologies, our indoor heat exchangers utilise Ø5mm copper pipes to ensure heat is removed from your home efficiently.

2

DC FAN MOTOR

Daikin indoor units are equipped with a high efficiency DC fan motor. By utilising high power permanent magnets instead of the induced magnetism of conventional AC motors, Daikin's DC motor can deliver significantly higher motor efficiency.

3

SIROCCO FAN

Daikin's ducted units are fitted with lightweight single injection moulded Sirocco Fans. These fans feature an aerodynamic fan blade design which reduces turbulence for a more efficient and quieter airflow delivery.

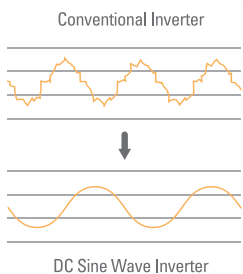

4

ENHANCED REALIBILITY

The indoor unit's fail safe logic is designed for the summer. Fan speed is regulated on start-up when roof temperatures are at an extreme level for enhanced reliability.

For over 90 years, Daikin has invested heavily in Research and Development to deliver more effective climate control for you and your family. Daikin technologies help make Daikin heat pumps energy efficient, powerful, reliable and easy to use.

OUTDOOR UNIT

5

INVERTER COMPRESSOR

Daikin's swing and scroll DC sine wave inverter compressors are quieter and more efficient than conventional compressors, thanks to their high pressure dome construction and the usage of high pressure lubrication oil.

6

RELUCTANCE DC MOTOR

Daikin's Reluctance DC motor utilises the magnetic torque of neodymium magnets in conjunction with reluctance torque, resulting in more energy efficient operation. These neodymium magnets are 10 times stronger than conventional ferrite magnets.

7

SAW EDGE FAN BLADE

The addition of a saw tooth edge at the rear of the blade smooths airflow over the blade surface, reducing turbulence which in turn results in a quieter, more efficient means of delivering comfort to your home.

8

REFRIGERANT COOLED PCB

The heat produced by the inverter PCB module is cooled by a sub heat exchanger*. This provides stable operation, enhanced reliability and continuous operation at up to 50° CDB ambient^.

*Refrigerant Cooled PCB only applicable to RZAS71-160CV1, RZA85-160CV1 & RZA71-160CV1
 ^50°CDB ambient only applicable to RZAS71-160CV1

OUR DUCTED PRODUCT RANGE

HSP & MSP DUCTED

(NZ ONLY)

FDMA Series

The NEW HSP Single Split Ducted has a depth of only **700mm** and is specially designed with New Zealand homes in mind.

BEST FOR:

- Designed for Modern Kiwi Homes
- Depth of Only 700mm for Precision Fit
- R32 Refrigerant for Enhanced Efficiency and Lower Global Warming Potential

CONTROLLERS:

NAV EASE
ZONE CONTROLLER
STYLISH CONTROLLER
DAIKIN AIRBASE
AIRZONE

All Controllers Are Optional & Separately Sold

R22 RETROFIT CAPABILITY

Provides a cost effective and convenient upgrade from an existing R22 ducted system whilst retaining the field piping. *

NIGHT QUIET MODE

Reduces the outdoor noise levels during sleeping hours and automatically resumes normal operations in the morning.

BUILT-IN DRAIN PUMP

Built-in drain pump as standard.

COMPACT DESIGN

140 and 160 Class is now housed in a compact indoor casing for easier installation.

ONLY FOR NZ MARKET

Specifically designed with New Zealand homes in mind.

R32 REFRIGERANT

R-32 has approximately a third of the global warming potential of R-410A and zero ozone depletion potential.

*Strict guidelines apply for R22 Retrofit Capability, please speak to your installer for further information.

Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed underfloor.

AIRZONE

All Controllers Are Optional & Separately Sold

SUPERIOR ENERGY PERFORMANCE

Engineered with features such as a redesigned CrossPass Heat Exchanger on the outdoor unit, DC Fan motor on the indoor unit and Daikin's patented swing compressor, our new Premium Inverter series takes energy efficiency to the next level.

NIGHT QUIET MODE

Our outdoor units are amongst the quietest on the market. If the noise levels need to be further reduced, engaging the Night Quiet Mode feature will reduce the noise levels by 4dBA^{**}.

R32 REFRIGERANT

R32 is the next generation in refrigerants with a substantially lower 'Global Warming Potential Factor' than R410A, providing less risk of harm to the environment*.

AUTOMATIC AIRFLOW ADJUSTMENT

Commissioning has never been easier. Automatic Airflow Adjustment feature allows the fan speed to adjust automatically to suit your duct design during commissioning, simplifying the process and saving time.

*Applies to 71-160 Class Models

**Outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions

[^]Strict guidelines apply for R22 Retrofit Capability, please speak to your installer for further information

Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed underfloor

PHASE OPTIONS

DESIGN FLEXIBILITY

The side discharge configuration of the outdoor unit enables convenient installation onto the narrow side access of modern homes. Additionally, the indoor unit can also be separated into 2 sections for easy installation and retrofit into existing homes.

AUSTRALIAN MADE

Indoor units are specifically designed and manufactured to Australian and New Zealand standards.

The Airbase Smartphone Interface is an optional accessory that allows you to control your Daikin Ducted anywhere, anytime System from anywhere, anytime

INCREASED OPERATION LIMITS

Built for the harsh summer season, the refrigerant cooled PCB technology incorporated in the outdoor unit enables continuous operations up to 50°CDB ambient.

HEATING FOCUS OPTION

Heating Focus models are available in 180, 200 & 250 Class. These models provide improved heating performance at low ambient temperatures, ideal for cold climate zones such as the South Island. These models are not R22 retrofit capable.

INVERTER DUCTED

FDYAN & FDYQN Series

Engineered to deliver a compact and efficient design, the new Inverter series is ideal for installation into the tight roof space of any modern home and now also features R22 retrofit capability[^].

CONTROLLERS:
NAV EASE
ZONE CONTROLLER
STYLISH CONTROLLER
DAIKIN AIRBASE

IMPROVED ENERGY PERFORMANCE

Adopting advanced technologies such as a DC Fan motor, Cross-Pass Heat Exchanger on the outdoor unit with increased heat exchange area and Daikin's patented swing compressor our new Inverter series is designed to operate with improved efficiencies throughout the year.

NIGHT QUIET MODE

Our outdoor units are amongst the quietest on the market. If the noise levels need to be further reduced, engaging the Night Quiet Mode feature will reduce the noise levels by 4dBA*.

EXPANDED 3 PHASE RANGE

Designed for homes with a 3 phase power supply in place, our new R32 Inverter series ensures a simple and convenient installation without the need to worry about unbalanced electrical loads at your electrical distribution board.

AUTOMATIC AIRFLOW ADJUSTMENT

Commissioning has never been easier. Automatic Airflow Adjustment feature allows the fan speed to adjust automatically to suit your duct design during commissioning, simplifying the process and saving time.

*Outdoor sound levels are determined in an anechoic chamber and may differ once the unit is installed due to ambient conditions
[^]Only applicable to 50-160 Class, strict guidelines apply for R22 Retrofit Capability, please speak to your installer for further information
Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed underfloor.

SPACE SAVING OUTDOOR UNIT

The Inverter series outdoor units are more compact than ever before. Models up to 200 Class are now encased in a space saving side discharge outdoor unit, allowing you to place the unit on the side access of your home and not compromise the external appearance of your home.

AUSTRALIAN MADE

Indoor units are specifically designed and manufactured to Australian and New Zealand standards.

COMPACT INDOOR UNIT

Today's modern home designs are maximising living spaces with higher ceilings causing roof spaces to shrink. Our Inverter series feature compact indoor units with a low profile height of ≤360mm allowing them to fit comfortably into the tight roof space of a modern home.

The Airbase Smartphone Interface is an optional accessory that allows you to control your Daikin Ducted anywhere, anytime System from anywhere, anytime

SLIM-LINE DUCTED

FBA Series

Designed specifically to suit installations where ceiling space is at a premium, our Slim-Line Ducted series has unparalleled flexibility and freedom of design.

Ideal for narrow ceiling spaces, this ducted system meets the challenges of modern commercial and medium density apartment development.

BEST FOR:

- Heating or cooling multiple rooms
- Narrow ceiling spaces
- Bedroom and lounge air conditioning

CONTROLLERS:

- NAV EASE
ZONE CONTROLLER
- STYLISH CONTROLLER
- DAIKIN AIRBASE
AIRZONE

All Controllers Are Optional & Separately Sold

SLIM-LINE INDOOR

Industry leading low profile design of 245mm height ensures clearance in most narrow roof spaces.

AUTOMATIC AIRFLOW ADJUSTMENT

Allows the fan speed to adjust automatically to suit your duct design for optimum airflow distribution.

DESIGN FLEXIBILITY

DC fan with a static pressure of 150Pa and up to 75m (100 Class) of available pipe run to suit your design layout.

FLEXIBLE RETURN AIR

Option of a rear or bottom suction return allows for greater installation flexibility.

R22 RETROFIT CAPABILITY

Provides a cost effective and convenient upgrade from an existing R22 ducted system whilst retaining the field piping.

BUILT-IN CONDENSATE PUMP

DC Condensate pump is equipped as standard with a 850mm lift.

Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed under floor.

BULKHEAD SYSTEM

FDYBA Series

The new R32 Bulkhead range is the ideal choice for air conditioning areas where a discreet installation is preferred.

The indoor unit fits flush into the ceiling with only the suction air and discharge grilles visible inside your home and leaving maximum floor and wall space for furniture, decoration and fittings. The Bulkhead range is truly discreet with whisper quiet operations to ensure limited impact to internal room aesthetics and acoustics.

BEST FOR:

- Heating or cooling one area of your home
- Drop ceilings & shallow ceilings
- Bedroom and lounge applications

ULTRA COMPACT

With a height of 200 mm and a depth of 450 mm, new LSP duct is suitable for a variety of applications with limited installation space.

COMFORT

Switchable fan speed: 5 steps and Auto. (Auto fan speed applicable when wired remote controller is used)

HIGH EFFICIENCY

DC fan motor and built-in DC drain pump with high lift (750mm) also result improve energy efficiency.

FLEXIBLE RETURN AIR

Option of a rear or bottom suction return allows for greater installation flexibility.

¹BDG20A09A1 for 25 Class, BDG20A15A1 for 35-50 Class & BDG20A20A1 for 60-71 Class. Only compatible with BRC1E63 controller.

²BAE20A62 for 25 Class, BAE20A82 for 35-50 Class & BAE20A102 for 60-71 Class (all models extend depth by 188mm). Only compatible with BRC1E63 controller.

Note: R32 ducted indoor units must be installed in the ceiling space, it is not to be installed under floor.

Wireless - DIAxD	Ø67x15

Need a second controller?
Daikin Airbase is a great option!

AIRHUB COMES IN TWO VERSIONS

1. ON/OFF ZONE CONTROL*

Allows users to air-condition occupied zones and switch off unoccupied zones. Features Airside Control.

Example:
Temperature set point @ 22°C in all ON zones

2. LINEAR ZONE CONTROL**

Enables users to switch zones on and off as well as set the zone temperature to within ±2°C. Features Opti-Zone Control.

For Linear Control, a remote temperature sensor is required for each zone. Wired or wireless options are available.

Example:
Main temperature set point @ 22°C with a ±2° range

* Only compatible with all Premium Inverter and Inverter Ducted models, however Airside Control feature is not available on R410A (FDYQN) Inverter Ducted series

** Only compatible with R32 (FDYA) Premium Inverter Ducted 71-160 Class and R32 (FDYAN) Inverter Ducted 50-160 Class

WHAT IS AIRSIDE CONTROL?

As zones are turned off, the indoor unit fan reduces speed between 60-100% of the nominal airflow rate to meet the airflow requirement of the remaining open zones for quieter operation and greater energy savings.

WHAT IS OPTIZONE CONTROL?

OptiZone Control will automatically regulate the individual zone dampers to deliver precise airflow to meet the temperature settings and heat load of each zone. As the zone dampers adjust, the indoor unit fan speed will intelligently regulate between 30-100% of the nominal airflow rate to deliver the required airflow to maintain the comfort levels of each zone.

On days when the heat load is mild or low, significant energy savings can be achieved through OptiZone Control, truly optimising the system for ultimate comfort.

Note: Note that 24V Motorised dampers are available in Daikin to be sold separately. Please ask Daikin for this.

CONTROL YOUR DAIKIN

STYLISH CONTROLLER

The Beauty of Simplicity

Guarantees comfort in the most intuitive way imaginable.

2 COLOURS

Available in two attractive colours, the new remote controller adds style and sophistication to any indoor space. Measuring just 85 x 85 mm, the remote controller is extremely compact and will become a fluid part of any background.

SLEEK STYLISH DESIGN

Much like the perfection of its circular shape, the remote controller gives you perfect control over your individual climate.

USER FRIENDLY INTERFACE

The new remote controller combines functionality and simplicity. The minimalistic touch button control enlarges the display and makes the remote controller both easy and enjoyable to use.

DAIKIN APP FOR INSTALLER WITH USER FRIENDLY INTERFACE

Simplifies the advanced settings such as field settings and set point range.

- Visual interface simplifies advanced settings such as energy saving activation, setting restrictions, etc
- Easy and quick commissioning, saves time and cost for installers.
- Featuring Bluetooth low energy technology.

"Does it do what a Daikin does?"

NAV EASE CONTROLLER

FEATURES

-  Backlit Display - Clear large, easy to read text with an intuitive interface.
-  Weekly Schedule Time - Program on and off times to suit your lifestyle.
-  Home Leave Function - Can turn your air conditioner on automatically when room temperatures drop below 10°C.
-  Quick Cool / Heat Mode - Temporarily increases air conditioning power to rapidly reach your desired operating temperature, before automatically returning to normal operation.
-  Off Timer Feature - Automatically turns your air conditioner off after operating for a predefined time (30 - 180 mins).
-  Temperature Limit, to predefine a temperature range for cooling or heating cycles, helping you reduce your energy consumption.

(Included with Premium Inverter Ducted and Inverter Ducted models)

NAV EASE MODEL NO: **BRC1E63**

SPECIFICATION

HxWxD (mm)	120x120x19
Screen (Diagonal)	3.33"

Airbase compatible

Notes:

1. FDYA(N), FDYQ(N), FDMA, FBA and FDYBA models only. FDYBA models require a wireless remote controller upon request. (BRC4C65 - Sold separately).
2. Zone Controller cannot be used in conjunction with any other controller besides the Daikin Sub Zone Controller option
3. For a full list of features of the controllers listed here, please speak to your dealer

ZONE CONTROLLER

(ON / OFF CONTROL ONLY)

FEATURES

-  Backlit Display - Clear large, easy to read text with an intuitive interface.
-  Multiple Zone Control - Control up to 8 zones, each zone can be tuned on or off depending on your requirements.
-  Countdown On/Off Timer - Quick and easy means to set up the operations of your unit.
-  7 Day Time Clock - Program on and off times, including when to open/close zones and the temperature sensor to use.
-  Automatic Mode Changeover - Allows the unit to automatically switch between heating and cooling for year round comfort.
-  Filter Cleaning Reminder - Automatic notification when filter cleaning may be required.

(Optional with Premium Inverter Ducted and Inverter Ducted models)

BRC230Z4B	Up to four zones (230-240v)
BRC230Z8B	Up to eight zones (230-240v)
BRC24Z4B	Up to four zones (24v)
BRC24Z8B	Up to eight zones (24v)
BRCszC1	Slave zone controller

SPECIFICATION

HxWxD (mm)	120x170x24
Screen (Diagonal)	3.17"

Airbase compatible

Notes:

1. FDYQ(N), FDYA(N), FDMA and FBA models only.
2. Airbase is not compatible with Slave Zone Controller
3. Airside Control function regulates the fan RPM between 60% to 100% of the indoor unit's rated airflow and it is only available for FDYQ & FDYA(N) series

WIRELESS REMOTE CONTROLLER

FEATURES

-  On/Off Timer - Program on and off times within the day to suit your needs.
-  Set Mode - Automatic, Dry, Cooling, Heating, Fan Only Operation
-  Fan Speed Control - Automatic, Dry, Cooling, Heating, Fan Only
-  Airflow Direction Adjustment - Auto swing (On/Off)
-  Filter Sign Reset - Reset Filter Clean Countdown

BRC4C65

Signal receiver unit (Installed type)

Wireless remote controller is supplied in a set with a signal receiver

AIRZONE VAF ZONING SYSTEM

The Airzone VAF Zoning System is a variable airflow zoning system compatible with Daikin's range of residential and commercial range of ducted indoor units. It offers superior comfort by providing individual temperature control in each zone and improved energy savings via its intelligent fan speed control.

Each solution consists of Airzone touch controllers, 4-step linear dampers (12V) and a VAF control PCB with Daikin P1, P2 communication module*.

BLUEFACE

Main Controller

THINK

LITE

Zone Controllers

FEATURES

Touch Controllers - Featuring premium aesthetic design with intuitive touch screen interfaces for ease of use. Available in 3 models: Blueface, Think and Lite.

Q-Adapt Algorithm - The controller automatically selects the appropriate fan speed (L/M/H) depending on number of zones opened and the demand, resulting in reduced running costs.

Individual Temperature Control - The 4-step linear dampers precisely regulate airflow into each zone ensuring optimal temperatures for all occupants in the household at anytime.

Scalable Design - Up to 10 zones can be controlled via a single VAF system and coupled with a simple control architecture, this makes scalability and installation convenient.

*A BRC1E63 (Nav Ease) will also be required for backup and servicing

AIRBASE MOBILE APP

Daikin Airbase brings all your Ducted System's features* together with a simple to use app.

FEATURES

-  Countdown On/Off Timer - Quick and easy means to set up the operations of your unit.
-  Operation Mode Theming - Each operation is colour-coded for easy association.
-  Filter Cleaning Reminder - Automatic notification when filter cleaning may be required.
-  Zone On/Off - Turn the zones on or off in your home (requires Zone Controller).
-  Multiple Zone Control - Control up to 8 zones, each zone can be turned on or off depending on your requirements. (Requires Zone Controller).
-  Custom Zone Names - Customise the name of the zones through your home. (Zone Controller Required).

*Some features only compatible with Daikin Zone Controller Each ducted system requires a BRP15B61 adaptor & must be connected on the same Wi-Fi network

AIRBASE FEATURES

- Note that not all functions may be available for your system.

Outdoor Unit	Compressor	Type	Hermetically sealed swing type					
		Motor output (kW)	0.80		1.30			
	Refrigerant charge (R-32)	kg	0.73		1.35		1.50	
		(Charged for 10m)		(Charged for 30m)		(Charged for 10m)		
	Sound pressure level ^F	Cool (dBA) / Heat (dBA)	45 / 48	47 / 48	47 / 50	48 / 51	53 / 55	
		Night quiet mode (dBA)	(Reduced from rated sound pressure level)					
	Sound power level	dBA	60		62	63	67	
Dimensions (HxWxD)	mm	550x675x284		595x845x300		695x930x350		
Machine weight	kg	28		45		54		
Certified Operation Range	Cool (°CDB) / Heat (°CWB)		-10 to 50 / -15 to 18					
Piping connections - Drain	Liquid (Flare)	Ø 6.4						
	Gas (Flare)	Ø 9.5		Ø 12.7				
	Indoor unit (mm)	PVC26 (I.D Ø20 x O.D Ø26)						
	Outdoor unit (mm)	Ø 16.0 (Hole)						
Max. interunit piping length	m	20 (Equivalent length 30)		30 (Equivalent length 45)				
Max. installation level difference	m	15		20				
Heat insulation	Both liquid and gas piping							

Notes:

- Rated cooling capacities are based on the following conditions: Indoor temp., 27°CDB, 19°CWB; outdoor temp. 35°CDB, 24°CWB. Equiv. refrigeration piping, 7.5 m (horizontal)
- Rated heating capacities are based on the following conditions: Indoor temp., 20°CDB, 15°CWB; outdoor temp., 7°CDB, 6°CWB. Equiv. refrigeration piping, 7.5 m (horizontal)
- Capacities are net, including a deduction for cooling (an addition for heating) for indoor fan motor heat.
- External static pressure is changeable by remote controller.
- The indoor sound levels are determined in accordance with ISO 3745:2012. Values indicated are determined at 1.5m to rated condition, at rated static pressure.
- Air filter is a standard accessory, supplied with the unit.
- The operation sound is measured in anechoic chamber. If it is measured under the actual installation conditions, it is normally over the set value due to environmental noise and sound reflection.

* Values based on Energy Efficiency (Energy Using Products) Amendment Regulations 2020.

TCSPF: Total Cooling Seasonal Performance Factor / HSPF: Heating Seasonal Performance Factor
In simple terms, TCSPF & HSPF represents the ratio of the Total Cooling & Heating capacity of the air-conditioner relative to the Total energy consumed by the air-conditioner during the Total Cooling & Heating operation periods in a year. Whereas the previous index of AEER & ACOP was calculated using only one representative outdoor temperature (35° for cooling and 7° for heating), the new index of TCSPF & HSPF uses a broader range of annual outdoor temperatures* as stipulated in AS/NZS 3823.4.1:2014 Further, the annual outdoor temperatures are based on zoning Australia / New Zealand into three distinct climate zones (Hot/Average/Cold). This allows you to determine the performance efficiency of different air-conditioners by comparing their TCSPF & HSPF within the same climate zone.
* Residential & Commercial TCSPF/HSPF are calculated based on different annual outdoor temperatures.

FEATURES AND BENEFITS

ENERGY EFFICIENCY

INVERTER OPERATION

An inverter system works like the accelerator of a car, gently increasing or decreasing power to steadily maintain your optimum temperature without fluctuations. That means uninterrupted comfort and significant savings on running costs. Daikin premium inverters can also reach your desired temperature faster than conventional heat pumps.

AUTOMATIC MODE CHANGEOVER

Automatically selects heating or cooling modes to suit thermostat settings and prevailing room temperature.

PREDICTED MEAN VOTE (PMV) CONTROL

Measures indoor and outdoor temperatures to calculate the ideal room temperature, gently adjusting it for the optimum balance between efficiency and comfort.

TEMPERATURE LIMIT OPERATIONS

Lets you pre-define temperature range for cooling or heating, to reduce energy consumption.

HOME LEAVE

Ideal for cold climates, when activated, home leave turns your heat pump on automatically when room temperatures drop below 10°C, keeping your home at or above 10°C so it never gets really cold.

AUTOMATIC FUNCTIONS

AUTO RESTART AFTER POWER FAILURE

The heat pump memorises the settings for mode, airflow, temperature etc. and automatically returns to them when power is restored after a power failure.

SELF DIAGNOSTICS WITH DIGITAL DISPLAY

Malfunction codes are displayed on your control panel for fast, easy fault diagnosis and maintenance.

ANTI-CORROSION COATING

An anti-corrosion coating on outdoor heat exchangers gives greater resistance to salt damage and atmospheric corrosion.

COMPACT DESIGN

The compact design of Daikin ducted indoor units allows them to be installed in confined areas, and they can also be dismantled for easier installation in tight roof spaces.

COMFORT CONTROL

NIGHT QUIET MODE

Outdoor unit noise is automatically reduced by 3 dB when outdoor temperatures fall more than 6°C from the day's maximum (set during installation).

PROGRAM DRY MODE

In this mode, priority is given to reducing the level of humidity in the room rather than room temperature.

INTELLIGENT DEFROST

During heating operation in low ambient temperature conditions, frost can form on the outdoor unit heat exchanger which can reduce your heat pump's performance. Daikin's intelligent defrost system constantly monitors a range of system parameters and temperatures to determine the optimum time to commence a defrost operation for maximum performance in cold conditions.

HOT START

Prior to heating, the indoor unit warms to a pre-set temperature before the fan switches on, ensuring only warm air is discharged and eliminating cold drafts.

QUICK COOL/HEAT – POWERFUL MODE

This feature temporarily increases power to more rapidly reach your desired room temperature, before automatically returning to normal operation.

TIMER CONTROL

24 HOUR ON/OFF TIMER

This timer can be pre-set to start and stop at any time within a 24 hour period.

NIGHT SET MODE

A timer off circuit gradually adjusts pre-set cooling and heating levels, preventing sudden temperature changes during the night and improving economy.

SEVEN DAY TIME CLOCK

This allows you to program your heat pump to turn on or off at set times for every day of the week.

1. Only available on Nav Ease

2. Night Quiet and Night Set modes may reduce capacity

3. Low noise operation requires optional PCB

4. Only available on FDYQN180-200LCV1

5. Can be set up by installer during installation

6. Only available on AirHub On/Off Zone Controller & Zone Controller

7. Optional accessory & only compatible with Nav Ease or Zone Controller

8. Optional accessory & only compatible with Nav Ease Controller (BRC1E63)

9. Optional accessory, compliant to AS/NZS 4755.3.1:2012

10. Only available on AirHub Linear Controller

HOW TO BUY A DAIKIN PRODUCT

Buying a new Daikin is as simple as contacting one of our trusted **Daikin Specialists**. Our Specialists have years of local experience and expertise in the air conditioning industry, ensuring that you get top quality advice and support for your needs.

IN-HOME QUOTATION

Daikin Specialists provide custom designed solutions for your home through an in-home quotation. Specialists will not only supply and install the best possible air conditioning solution but will also provide ongoing maintenance to ensure peak efficient performance over the life of the system.

To take the stress out of air conditioning your home, speak to a Daikin Specialist. With over 50 Specialist Dealers across New Zealand, we are ready to help you fit the right air conditioning solution for your home.

To find your nearest Daikin Specialist, visit: www.daikin.co.nz or call **0800 20 90 10**

The specifications, designs and information in this brochure are subject to Change without notice. Unit colours shown are as close as possible to actual unit colours. Colours depicted in this brochure may vary slightly.

ASSUMPTIONS

All representations made in Daikin marketing and promotional material are based on the assumptions that the correct equipment has been selected, appropriately sized and installed in accordance with Daikin's installation instructions and standard industry practices.

QUALITY CERTIFICATIONS

Daikin Industries Limited was the first air conditioning equipment manufacturer in Japan to receive ISO 9001 certification. All Daikin manufacturing facilities have been certified to ISO 9001 Quality Management System requirements. ISO 9001 is a certificate for quality assurance concerning 'design, development, manufacturing, installation and related service' of products manufactured at that factory.

ENVIRONMENTAL CERTIFICATIONS

Daikin Industries Limited has received ISO 14001 Environmental Certification for the Daikin production facilities listed below. ISO 14001 is an international standard specifying requirement for an environmental management system, enabling an organisation to formulate policy and objectives, taking into account legislative requirements and information about significant environmental impacts. It applies to those environmental aspects within the organisation's control and over which it can be expected to have an influence.

The certification relates only to the environmental management system and does not constitute any endorsement of the products shipped from the facility by the International Organisation for Standardisation.
